

INTERNATIONAL HUMANE TRAPPING STANDARDS (IHTS)

Update September 27th, 2018

Illustrations of certified traps are available on the Department's Web site at this address:
<http://www.mffp.gouv.qc.ca/english/publications/online/wildlife/trapping-regulations/devices/aihts.asp> .

For certain species and certain types of traps, only traps "certified" compliant with these international humane trapping standards (IHTS) are allowed to be used (see «obligatory use» sections).

IHTS certified traps – USE NOT REQUIRED but recommended

For the following species and categories of traps, the obligation to only use traps “**certified under the Agreement on International Humane Treatments Standards (IHTS)**” is not yet in effect. The date of the entry into force, if applicable, will be known at least three years ahead of time and may vary from one species to the next.

Starting in the **2020-2021** trapping season, IHTS-certified live capture traps will be compulsory for beavers (cages) and wolves.

In the meantime, the traps currently authorized for these species continue to be authorized. Nevertheless, we are recommending the use of the following IHTS certified traps:

USE NOT OBLIGATORY but RECOMMENDED IHTS certified killing traps
Mink (underwater)
Any jaw-type trap (body-gripping or leg-hold) that exerts a clamping force on the animal, and maintains it underwater
Mink, skunk and squirrel
No killing traps certified to date

USE NOT OBLIGATORY but RECOMMENDED IHTS certified live capture traps	
Beaver (Cage) These traps are currently authorized only for wildlife management control (relocation) or scientific purposes.	
<ul style="list-style-type: none"> ◦ Comstock 12 x 18 x 39 Swin Through Cage ◦ Breathe Easy Live Trap ◦ Ezee Set Live Trap 	<ul style="list-style-type: none"> ◦ Hancock Live Trap ◦ Koro « Klam » Live Trap
Coyote
